FREE GUIDE: How to Build Your Website for FREE

Welcome!

Ready to launch your business online without spending a dime? This in-depth guide walks you through how to build a stunning, functional website from scratch — using **100% free tools**. No coding. No design background. No tech stress.

Whether you're launching a side hustle, a new brand, or just testing the waters, this guide will help you confidently create your first website.

Let's get you online fast — and for $0.

💡 What You Need

Here's a breakdown of the exact tools you'll be using, all beginner-friendly and completely free.

1. Domain (Temporary but Free)

- Use: freenom.com
- Get a free domain ending in .tk, .ml, .ga, etc.
- **Tip:** Later, you can upgrade to a paid domain (like .com) for more credibility.

2. Website Builder

- Use: systeme.io

- Why? Drag-and-drop website creation, funnels, email marketing — all in one free account. No coding needed.

3. Design Tool

- Use: canva.com

- Create your website logo, banners, and graphics easily.

4. Stock Images

- Use: pexels.com and unsplash.com

- Search for any topic to find free, professional-grade images.

5. Icons & Graphics

- Use: flaticon.com

- Great for adding visual polish to your site.

6. Free Business Email (Optional)

- Use: zoho.com/mail

- Create a professional email like you@yourbusiness.tk

🚀 Step-by-Step Instructions (No Tech Skills Needed)

Step 1: Register a Free Domain

Go to Freenom → choose a domain name (example: yourbrand.tk) → register it for free for 12 months.

Step 2: Create a Free Website Account

Sign up at Systeme.io → Choose **Funnels** → Create a new funnel → Select **Build an Audience**.

Step 3: Choose a Template

Browse free templates or start from scratch.

Step 4: Add Your Branding

Use Canva to create your logo (try 500x500 pixels) and header/banner.

Step 5: Add Pages

Include these 3-5 essential pages:

- Home
- About
- Services or Products
- Contact
- Testimonials (optional)

Step 6: Add Text and Images

Use free images from Pexels or Unsplash. Keep text simple and clear (Example: "We help you do X so you can Y.")

Step 7: Connect Your Free Domain to Systeme.io

Go to your Systeme dashboard → Settings → Custom Domain → Follow their DNS setup guide.

Step 8: Publish and Go Live!

Preview your site → Click **Go Live** → Share your URL with the world!

Estimated Time: 2–4 hours
Total Cost: $0

✨ Extra Beginner Tips

- **Keep it simple.** Focus on clarity over fancy design.

- **Test on mobile.** Most visitors will see your site on phones.

- **Use CTAs.** Add buttons like "Book a Free Call" or "Send a Message."

- **Add a contact form.** Systeme.io makes this easy.

⭐ Don't Want to Do It All Yourself?

Sometimes you just want it **done fast, done right, and without the headache.**
